

PRICE GUIDE

Fleet Complete Platform

Fleet Complete's comprehensive telematics platform was developed to address a wide variety of requirements, scaling to unique needs of businesses of any size. We are continuously investing and constantly developing the software to be world-leading. Fleet Complete Web is priced perfectly for the SMB space and has full mobile app integration.

Fleet Tracking

The FT1 is an advanced GPS fleet tracking solution on the LTE-M network that provides visibility and insight over your assets and workforce in near real-time. Available exclusively on FC Web The FT1 device connects to your vehicle's Engine Control Module through the OBD-II connector and provides your fleet managers accurate vehicle data, such as true odometer readings, Diagnostic Trouble Codes (DTC) codes, engine status and fuel consumption.

Asset Tracking

Plant and other mobile assets are often vulnerable to theft or misuse, especially when located on remote sites. Fleet Complete have two main solutions to keep track of all things non-powered – think trailers, generators, construction equipment and more!

	AT6 HARDWARE \$344 MRO \$11.40 per month hardware		AT5 HARDWARE \$250 MRO \$8.30 per month hardware		AT1 HARDWARE \$199 MRO \$6.30 per month hardware
 4G	SOFTWARE \$16 per tracker per month is required for both options available on Fleet Complete Web.	 Satellite Device	SOFTWARE Standard \$20 Extra \$30 per device per month	 Built in Sensors	SOFTWARE \$13 per device per month

For every customer start asking the following questions

These are key questions that can be applied to all companies that operate a fleet, using these can help start the conversation around telematics and qualify if they are a potential opportunity.

- ▶ Do you have any vehicles, assets or staff that operate outside of the office?
- ▶ How do you currently manage the visibility of these resources?
- ▶ How are you currently measuring unnecessary costs associated to vehicles?
- ▶ Are you able to answer queries from customers as to the location and expected arrival times of drivers/technicians?
- ▶ How do you measure productivity of your drivers?
- ▶ Are you concerned with unauthorised use of your equipment?
