

# MEETING NDIS COMPLIANCE THROUGH EFFECTIVE FLEET MANAGEMENT

The rollout of the NDIS is changing the way not-for-profits do business. NFPs that offer transport services will now need to meet specific compliance requirements as outlined in Module 7 of the NDIS Provider Tool Kit – Payment and Assurance. To ensure prompt payment of transportation services, NFPs will now need to provide a log book of all client journeys completed.

## The 3 common challenges across the sector

Fleet Complete’s extensive industry research indicates that Fleet Managers in the NFP space are also experiencing the following challenges:

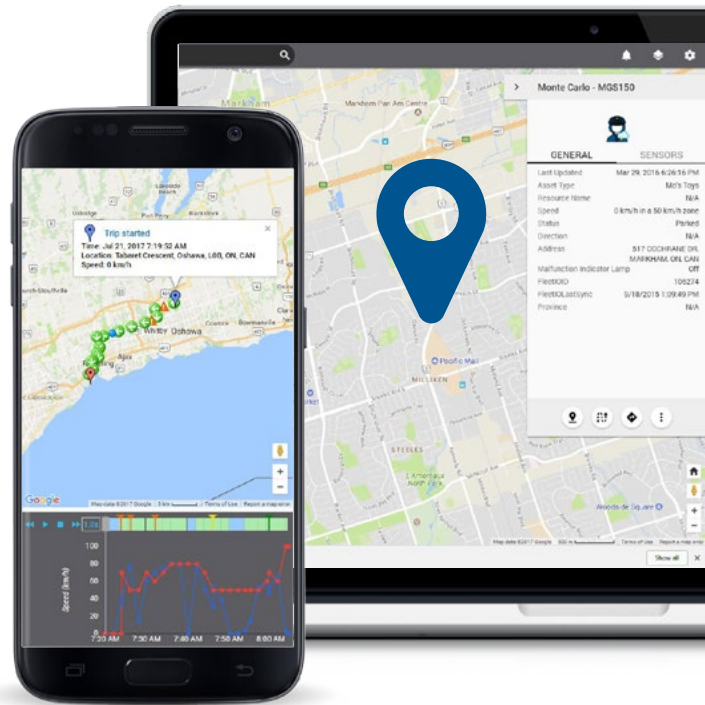

**1** Seeking an effective way to gain a transparent view of mileage covered and employ a suitable mechanism of control to reduce cost.

**2** Enhance and promote a culture of high safety awareness among drivers, carers and potentially lone workers within their workforce.

**3** Deploying a centralised approach towards ensuring all vehicles are maintained at optimum levels and reducing Total Cost of Ownership (TCO).

# GAIN A COMPETITIVE ADVANTAGE WITH FLEET COMPLETE'S NOT-FOR-PROFIT IVMS SOLUTION

Fleet Complete is a leading global provider of mission critical fleet asset and mobile workforce management solutions. We have an enviable track record of assisting businesses to reduce risk and enhance workforce productivity.

## NDIS claims

Our Trips History Reports will make it easier to develop logbooks to provide proof that transport services have been completed and be submitted for payment claims.

## Safety culture

The systems can be used as a tool to improve driver habits and provide connectivity with your remote lone workers.

## Reduced paperwork

Our system eliminates the need for carers to fill in logbooks and instead focus on what they do best, which is care for your clients.

## Productivity

The biggest ROI will come from developing a clear view of your fleet's footprint and form the basis of easily understanding utilisation and areas for creating efficiency.

## Vehicle health

The system provides a centralised platform to manage service reminders, driver licence details, carer accreditation details and understanding critical engine data.

## Improved customer service

Have the ability to accurately communicate to customers how far vehicles are from their respective pick up or delivery.

“The software is great, it is really easy to use and has a lot of a capabilities. The staff have really embraced it,”

- Diabetes SA
