

Fleet Complete Asset Tracker Solution

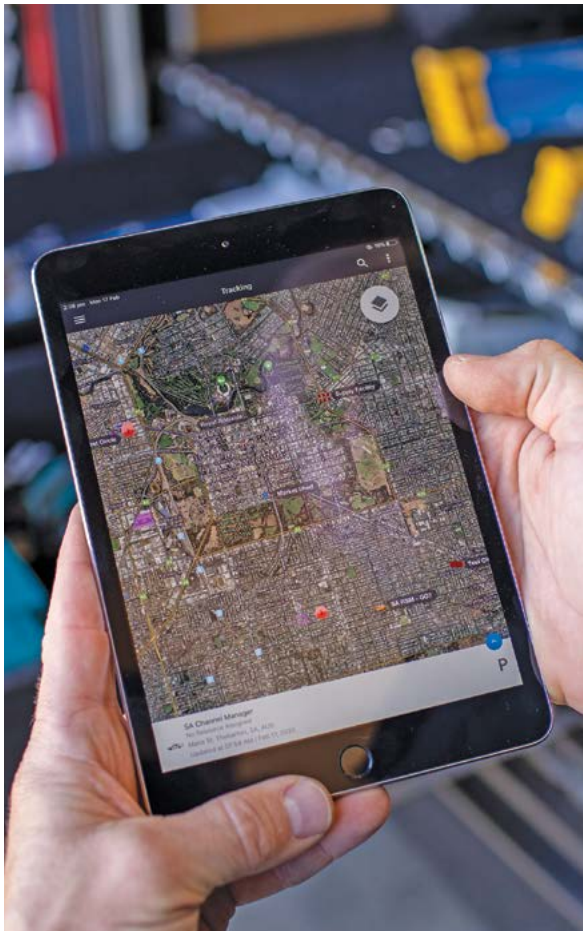

Protect your equipment, machinery and tools with our cost-effective, compact, long-lasting GPS Asset Trackers.

Your partner in asset tracking

Your high-value equipment and machinery are the backbone of your business, and having these assets sit idle can result in unnecessary upkeep and opportunity costs. Even worse are the expenses incurred in the event of theft, loss, or misuse. Getting alerted to any unauthorised activity will help minimise extraneous costs, while having visibility into the precise location of your assets and their operational status will allow you to get the most out of your investment.

Fleet Complete Asset Tracker gives you the visibility you require without the need to be onsite 24/7. With battery powered GPS tracking devices that are attached to your equipment, trailers, containers, or other operational valuables in the field, you can gain access to the near real-time information you need to keep your business running smoothly and efficiently.

Key solution features

Location tracking: Track assets in one screen view and retrieve lost or stolen equipment fast to minimise downtime and replacement costs.

Inventory management: Automate end-of-day inventory and usage reporting and improve visibility with real-time alerts.

Help future-proof devices: Asset trackers use leading edge GPS technology, and receive automatic over the air updates to keep them current.

Durable battery life: With up to 2+ years of battery life, you can be sure that you have one of the smartest solutions for equipment control on the market.

Install in seconds: Using glue, double-sided tape or screws, the device is quick to install on any type of outdoor asset.

Small size: Some of the smallest tracking devices on the market the hardware can be covertly installed on various external assets.

Get notified on your smart device or desktop and get a better understanding of your asset remotely

Motion detection: Keep your finger on the pulse of your asset activity with hourly reports that help you detect unwarranted movement, afterhours use, or theft.

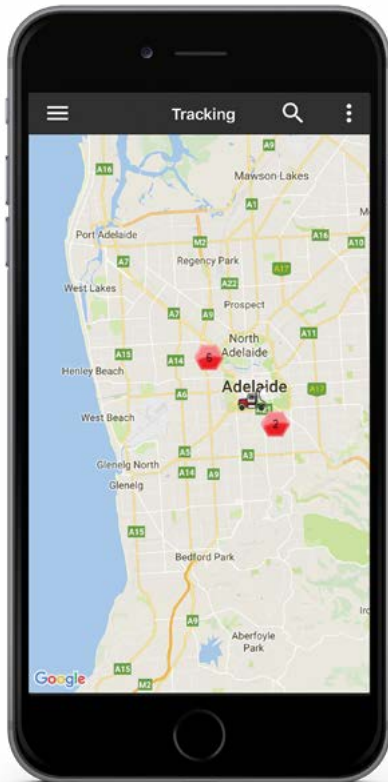

Tamper detection or change in sensor status: Stay informed with near real-time alerts on status, movement, and location to make quick decisions and address the situation at hand.

Location updates: Get daily reports on asset location to help ensure that your equipment is exactly where it is supposed to be.

Key features

- Quick & discreet installation through small, slimline design
- Battery power provides independently powered GPS tracking and removes the need for expensive proprietary batteries
- Water and dust resistant, robust to meet a range of harsh conditions
- Location & time reporting in preprogrammable timed intervals
- Powerful reporting and GPS mapping is integrated into our full suite of GPS fleet management technologies

Track your stationary assets

Transportation equipment

Trailers and shipping containers that can sit for days or longer periods without moving

Mobile office or storage

Construction offices or storage containers that stay on site

Unpowered construction or field equipment

Pumps, compressors, and generators that change locations intermittently

Powered construction equipment

Bobcats, backhoes, and cranes that move short distances

Refrigerated equipment

Trailers and containers that require climate control monitoring

Access detailed reports on your equipment's activity status

With a choice of detailed operational reports, Fleet Complete Asset Tracker will keep you informed when you need it. You can receive status and location snapshots from the field and set up rules to monitor

exceptions and unauthorised activity. You can also review the performance of any individual asset or your entire fleet, at any time.

Asset trackers - device comparison

Feature	AT1	AT6	AT5
	 <p>Small & powerful asset tracker</p> <p>One of the smallest and most cost-effective equipment trackers on the market, the AT1 asset tracker will give you great value for money. It is suited for any industry and is extremely versatile and includes humidity, temperature and light sensors.</p>	 <p>Feature-rich GPS asset tracker</p> <p>The AT6 is a rugged GPS device that provides near real-time status and movement updates, the accelerometer and GPS data are used to intelligently work out if it is moving and to send frequent updates, and to scale the update rate down to once per day if the asset is stationary - to preserve battery life.</p>	 <p>Remote satellite asset tracker</p> <p>A remote asset tracker available on the satellite network, when Telstra network coverage is unavailable. The AT5 offers reliable position reporting and an integrated GPS, all housed within a tough enclosure small enough to fit in your hand.</p>
Network	4G-LTE	4G-LTE	Iridium Satellite
Battery	2 x 3.6V AA	4 x C Industrial	4 x AAA Lithium
Default frequency	1 Poll per 24 Hours	Whilst moving: every 2 mins, transmitted every 30 mins Whilst stationary: 2 Polls per 24 Hours	2 Polls per 24 Hours
Battery life*	2+ Years	2+ Years	1 ½+ Years
Temperature	-40° to +85° C	-40° to +85° C	-30° to +60° C
Size	3.37 cm (H) x 5.66 cm (W) x 12.5 cm (L)	3 cm (H) x 6.5 cm (W) x 22.5 cm (L)	2.54 cm (H) x 6.85 cm (W) x 8.25 cm (L)

A scalable platform and additional solutions for your fleet

Fleet Tracker

An advanced GPS fleet tracking solution that allows you to manage your entire fleet from one screen and see what is happening remotely in the field. Know where your vehicles and crew are, their productivity levels, and all the fleet metrics you need.

Task Tracker

This cost-effective mobile application was specifically designed to help you manage multiple projects and jobs in the field. Send activities to mobile workers based on their geographical location and workload and easily keep track of all completed or pending assignments.

FBT Reporting

The Electronic Logbook solution is a simple and convenient way to automate your time-consuming vehicle logbook.

Remote Solution

Satellite, Dash Duress and Remote Pendant creates a solution that operates outside the mobile network coverage to help with safety of staff, vehicles and assets.

Enterprise Reporting

Our Enterprise Services team are available to setup and run your database and reporting for you. They will act as your IVMS administrator and provide you with the reports needed to reach your goals.

Things you need to know

Fleet Complete GPS Tracking solutions consists of two different hardware and software combinations, based on either the FC Web Platform or MyGeotab Platform. The G07 and MyGetoab (including Base Plan, Business Plan, and Fleet Plan) solution is not compatible with the FC Web Platform.

The Asset Tracker solutions are the latest in GPS Asset Tracking hardware available from Fleet Complete and utilise the FC Web Platform. Fleet Complete Asset Trackers are available to use with the Fleet Complete Fleet Tracking core solution to ensure all your vehicles and assets are visible in the one place.
